This is the time of the year when most people are wondering and studying what to get their friends for Christmas. Don't you think a new up-to-date tool would be appreciated more than anything else? See if our planes, saw vises, or saw sets would not be appropriate.

Our planes are different than other planes; they are positively guaranteed not to tear out, chatter, or clog even when used against the grain in the most difficult wood.

Our No Shift Folding Saw Vise is something for which Carpenters have been looking for a long time; that is, a saw vise on which they can file and joint a saw without shifting or turning the vise upside down for jointing, as is the case with all other steel vises now on the market on account of the loops on the ends of jaw.

For those wanting a lighter and less expensive vise our 14" vise would be the thing, but it requires one shift of saw.

Our Saw Set is worked with the foot leaving both hands free to guide the saw, and works on the trip hammer principle, giving each tooth the same amount of set.

Wishing you all a Merry Christmas and a Prosperous New Year we are,

Very truly,

**BUCKEYE SAW VISE CO.**
